

## CALL FOR ABSTRACTS

**It is our pleasure to invite you to the 27<sup>th</sup> CIRMS Annual Meeting on April 8-10, 2019 to be held at NIST in Gaithersburg, Maryland.**

The 2019 meeting theme, “Strengthening the Economy and Homeland Security with Radiation Measurements and Standards” is designed to give attendees an in-depth review of the current status on the economic impact of the uses of ionizing radiation and further demonstrate the needs of the Homeland Security sector to continue improvements.

The meeting agenda is formulated to include plenary presentations, breakout sessions, junior investigator project presentations, casual social events, and poster viewing sessions. To enhance your meeting experience and facilitate engaging peer interactions, we encourage you to submit an abstract summarizing your research (instructions can be found at <http://www.cirms.org/abstract-submission.html>). While all presenters will have opportunities to interact with live audiences following their presentation, the poster sessions will allow you and your peers to engage in relevant and detailed discussions. CIRMS 2019 sponsors are also invited to present posters that enable the attendees to appreciate and learn about the organizations and corporations that support CIRMS’ mission.

**Oral and Poster Presentations are being accepted!**
