

COUNCIL ON IONIZING RADIATION MEASUREMENTS & STANDARDS

Dear Colleagues,

Please save the date for the **28th Annual Meeting of the Council on Ionizing Radiation Measurements and Standards (CIRMS)** to be held **April 21 - 23, 2021** at [the Universities at Shady Grove Conference Center in Rockville, MD](#). Note the new location, which is still just a short distance away from the National Institute of Standards and Technology (NIST). Participants will be invited to attend the interactive and stimulating discussions and/or to submit abstracts for poster presentations and possible oral presentation during the working group sessions.

This is the CIRMS's 28th Annual Meeting and the theme is "*Building Synergy Among Standards Labs and End Users*". For over a quarter of a century, CIRMS has played an important role in serving as a public forum for discussion of radiation measurements and standards issues for industry, academia and government. The technical program next year will consist of plenary and poster sessions in the mornings followed by three parallel working group sessions held during the afternoons.

Further detailed information about the upcoming meeting will be soon posted on the [CIRMS website](#). We hope to see you all there!

Regards,

Renata

Renata Freindorf, M.Sc.
CIRMS Executive Admin. Assistant
